while the united states and indeed most of the western world fights an active war against islamic terrorism we remain in deep denial about who truly is the enemy elites across north america and europe fight to silence those who argue compellingly that the roots of terrorism are within islam itself which has evolved into far more than a religion it is a radical and dangerous political ideology which consciously if often tacitly places itself in opposition to democracy and basic human rights robert spencer one of the world's foremost critical scholars of islam has been labeled public enemy 1 by those who apologize for islam and its violent excesses he has been called a propagandist a racist and an islamophobe a term that he willingly embraces in this provocative and important book there needs to be a thoroughgoing and honest public discussion of the acceptable parameters of criticism of islam in light of genuine interests not only of national security but of civilizational

survival our lives quite literally could depend on it as could those of our children and our children s children confessions of an islamophobe is an attempt to begin that discussion

the international conference on geological information represents the first major attempt to bring together geoscience information specialists from allover the world the purpose of the conference was to assess the current state of the art in geoscience information from both the regional and functional point of view it was hoped that the conference could take steps to bring about increased international cooperation and collaboration in the field of geological information the papers ranged over the whole spec trum of documentation from primary publishing back to the user including data perhaps a keyword for the conference might be cooperation the idea of and need for cooperation was stressed in almost every talk the final panel session was devoted to a discussion on the formation of a proposed international association for geological information despite the growing pressure on information managers stimulated by increasing international activities in geology the global perspective of plate tectonics and worldwide concern for the availability of non renewable resources there does not exist an international organisation specifi cally concerned with geological information delegates agreed that there was no need for a new professional society of individuals but that a federation or similar organisation might be desirable in the final session it became apparent that if the geological information community is to make the best use of all the systems and developments available there is very clearly a need to know what exists in all these areas at present an urgent task is to identify these systems

this book provides a comprehensive reference for the many different types and methods of compression included are a detailed and helpful taxonomy analysis of most common methods and discussions on the use and comparative benefits of methods and description of how to use them detailed descriptions and explanations of the most well known and frequently used compression methods are covered in a self contained fashion with an accessible style and technical level for specialists and nonspecialists comments and suggestions of many readers have been included as a benefit to future readers and a website is maintained and updated by the author
