meaning well informed citizens who consume political news but do not take political action who is to blame for our broken politics the uncomfortable answer to this question starts with ordinary citizens with good intentions we vote sometimes and occasionally sign a petition or attend a rally but we mainly engage by consuming politics as if it s a sport or a hobby we soak in daily political gossip and eat up statistics about who s up and who s down we tweet and post and share we crave outrage the hours we spend on politics are used mainly as pastime instead we should be spending the same number of hours building political organizations implementing a long term vision for our city or town and getting to know our neighbors whose votes will be needed for solving hard problems we could be accumulating power so that when there are opportunities to make a difference to lobby to advocate to mobilize we will be ready but most of us who are spending time on politics today are focused inward choosing roles and activities designed for our short term pleasure we are repelled by the slow and steady activities that characterize service to the common good in politics is for power pioneering and brilliant data analyst eitan hersh shows us a way toward more effective political participation aided by political theory history cutting edge social science as well as remarkable stories of ordinary citizens who got off their couches and took political power seriously this book shows us how to channel our energy away from political hobbyism and toward empowering our values

politicians are reviled from jokes on late night tv talk shows to radio show rants and from public opinion polls to ubiquitous conventional wisdom politicians are among the most despised professional class in modern society drawing on seminal work in political science stephen k medvic convincingly argues to the masses that this blanket condemnation of politicians is both unfair and unwarranted while some individual politicians certainly deserve scorn for misjudgments moral failings or even criminal acts the assumption that all of them should be cast in a similar light is unjustified more importantly that deeply cynical assumption is dangerous to the legitimacy of a democratic system of government politicians as a class deserve respect not out of blind obedience to authority but because democratic deliberation requires it medvic explains how cognitive biases in the way people reason often lead us to draw unjustified conclusions of politicians in general based on the malfeasance of some scandals involving politicians are likely to be remembered and to serve as evidence of the belief that they all do it most politicians in fact care deeply about their cities states and nation but they face a

trap of unrealistic and contradictory expectations from the public about how politicians should behave medic in turn demonstrates the necessity of ambition the utility of politics for resolving conflicts peacefully and the value of ideology in framing political choices in the end citizens must learn to tolerate the inherent messiness of politics as the only viable alternative to violent conflict in the process we must embrace our role in the political system as well

a generation ago scholars saw interest groups as the single most important element in the american political system today political scientists are more likely to see groups as a marginal influence compared to institutions such as congress the presidency and the judiciary frank baumgartner and beth leech show that scholars have veered from one extreme to another not because of changes in the political system but because of changes in political science they review hundreds of books and articles about interest groups from the 1940s to today examine the methodological and conceptual problems that have beset the field and suggest research strategies to return interest group studies to a position of greater relevance the authors begin by explaining how the group approach to politics became dominant forty years ago in reaction to the constitutional legal approach that preceded it they show how it fell into decline in the 1970s as scholars ignored the impact of groups on government to focus on more quantifiable but narrower subjects such as collective action dilemmas and the dynamics of recruitment as a result despite intense research activity we still know very little about how groups influence day to day governing baumgartner and leech argue that scholars need to develop a more coherent set of research questions focus on large scale studies and pay more attention to the context of group behavior their book will give new impetus and direction to a field that has been in the academic wilderness too long

in this innovative account of the way policy issues rise and fall on the national agenda the first detailed study of so many issues over an extended period frank r baumgartner and bryan d jones show that rapid change not only can but does happen in the hidebound institutions of government short term single issue analyses of public policy the authors contend give a narrow and distorted view of public policy as the result of a cozy arrangement between politicians interest groups and the media baumgartner and jones upset these notions by focusing on several issues including civilian nuclear power urban affairs smoking and auto safety over a much longer period of time to reveal patterns of stability alternating with bursts of rapid unpredictable change a welcome corrective to conventional political wisdom agendas and instability revises our understanding of the

dynamics of agenda setting and clarifies a subject at the very center of the study of american politics
