simply put most entrepreneurial start ups fail those fortunate enough to succeed then face a second major challenge how to grow this book focuses on the key questions an entrepreneur must answer in order to grow a business based on extensive research of more than fifty successful growth companies grow to greatness discusses the top ten growth challenges and how to overcome them author edward d hess dispels the myth that businesses must grow or die growth can create value but too much growth too fast outstrips effective processes controls or management capacity viewing growth as recurring change grow to greatness lays out a framework for how to approach business development and how to manage its risks and pace the book then takes readers through chapters that explore whether the time is right to grow how to do it and how to manage the vital reality that growth requires the right leadership culture and people uniquely this book aims to prepare readers for the day to day reality of growth offering up the lived experiences of eleven entrepreneurs six workshops to assess where readers stand now and a suite of templates that will prove to be useful over time help bring the book s teachings to life after reading this book entrepreneurs will have a real understanding of their readiness to grow and place in the growth cycle as well as a concrete action plan for where to take their businesses next many books address how to start a business but this is a unique go to resource for readers who want to learn how to thrive beyond the start up phase

how to stay in charge in a world populated by algorithms that beat us in chess find us romantic partners and tell us to turn right in 500 yards doomsday prophets of technology predict that robots will take over the world leaving humans behind in the dust tech industry boosters think replacing people with software might make the world a better place while tech industry critics warn darkly about surveillance capitalism despite their differing views of the future they all seem to agree machines will soon do everything better than humans in how to stay smart in a smart world gerd gigerenzer shows why that s not true and tells us how we can stay in charge in a world populated by algorithms

machines powered by artificial intelligence are good at some things playing chess but not others life and death decisions or anything involving uncertainty gigerenzer explains why algorithms often fail at finding us romantic partners love is not chess why self driving cars fall prey to the russian tank fallacy and how judges and police rely increasingly on nontransparent black box algorithms to predict whether a criminal defendant will reoffend or show up in court he invokes black mirror considers the privacy paradox people want privacy but give their data away and explains that social media get us hooked by programming intermittent reinforcement in the form of the like button we shouldn't trust smart technology unconditionally gigerenzer tells us but we shouldn't fear it unthinkingly either

three e books in one hundred percenters mark murphy explains why true employee motivation is not achieved by focusing on making your people happy the most effective leaders are the ones who respect their people enough to push them to deliver real results to become hundred percenters basing its conclusions on a detailed study of more than 500 000 leaders and employees hundred percenters second edition provides the tools and techniques and the rationale behind them to help you create an army of employees who don't just do their best but who also deliver results hiring for attitude whether you're hiring new employees choosing existing employees for a new team or upgrading your current talent pool you need people with the right attitude in hiring for attitude top leadership strategist mark murphy shows you the five biggest reasons why new hires fail two quick and easy tests to discover the attitudinal characteristics that you need for your unique culture the five part interview question that gets candidates to reveal the truth about what their last boss really thinks of them where great companies really find their best candidates the six words most interviewers add to the end of behavioral interview questions that destroy their effectiveness hard goals in hard goals mark murphy explains the science behind getting from where you are to where you want to be in your career business and life steve jobs jeff bezos the school teacher next door who amassed a million dollar fortune did these people succeed because they were more motivated or because they were more disciplined the answer to both questions is yes but not in the ways you might think anyone can achieve extraordinary things the secret is setting goals that test the very limits of your abilities
