the new keyword in javascript can be quite confusing when it is first encountered as people tend to think that javascript is not an object oriented programming language what is it what problems

the new operator uses the internal construct method and it basically does the following initializes a new native object sets the internal prototype of this object pointing to the function prototype

update april 1st 2026 the beta site is being retired update february 27th 2026 another post discussing the changes with the chief product and technology officer is here update february

jul 20 2013 if the new generic constraint is applied as in this example that allows the class or method the authenticationbase t class in this case to call new t to construct a new instance of

dec 11 2009 a new expression is the whole phrase that begins with new so what do you call just the new part of it if it s wrong to call that the new operator then we should not call sizeof the sizeof

it is not bad to use the new keyword but if you forget it you will be calling the object constructor as a regular function if your constructor doesn t check its execution context then it won t notice that this

oct 4 2021 in the specific case of throw throw new is a shorthand for throw new exception the feature was introduced in c 9 and you can find the documentation as target typed new

83 new describes a constructor signature in typescript what that means is that it describes the shape of the constructor for instance take new t you are right it is a type it is the type of a class

new does not guarantee heap allocation and simply avoiding new does not guarantee stack allocation new is always used to allocate dynamic memory which then has to be freed by doing the first

jul 11 2013 note that if you declared it var a new and var o new object then there is one difference former is assignable only to another similar anonymous object while latter being object it
