we are undertaking the most tremendous move ever made by labor in this country a move which will lead no one knows where with these words echoing throughout the city on february 6 1919 65 000 seattle workers began one of the most important general strikes in us history for six tense yet nonviolent days the central labor council negotiated with federal and local authorities on behalf of the shipyard workers whose grievances initiated the citywide walkout meanwhile strikers organized to provide essential services such as delivering supplies to hospitals and markets as well as feeding thousands at union run dining facilities robert l friedheim s classic account of the dramatic events of 1919 first published in 1964 and now enhanced with a new introduction afterword and photo essay by james n gregory vividly details what happened and why overturning conventional understandings of the american federation of labor as a conservative labor organization devoted to pure and simple unionism friedheim shows the influence of socialists and the iww in the city s labor movement while seattle s strike ended in disappointment it led to massive strikes across the country that determined the direction of labor capital and government for decades the seattle general strike is an exciting portrait of a seattle long gone and of events that shaped the city s reputation for left leaning activism into the twenty first century

paolo favilli provides both students and scholars with an original reading of themes and issues found in karl marx s das kapital and its connections with present day challenges by way of continuous cross referencing between present and past favilli demonstrates claims that the scientific status of das kapital advanced by countless texts since its original publication are themselves deeply imbued by the spirit of the times if in 1963 jean paul

sartre could write that marxism was the unsurpassable philosophical horizon of our times what could make an undergraduate student today consider such a claim plausible informed by the latest research on marxist theory and decades teaching the philosophy of history favilli employs a didactic approach stimulating student engagement and learning opportunities in the classroom this approach allows for a better understanding of relationship between the present and the multiple temporalities that characterise and periodise the contemporary era what follows is a critique of the contemporary academy for its hangover of post 1989 nuovismo cult of novelty and inability to make the proper distinctions between marxism as party state the works of karl marx and marxism as an object of history this led to the spectacle where after 1989 those who had spent most of their careers as marxist hued scholars not only abandoned this identity but also spurned any recognition that marx and marxism were worthwhile objects of inquiry this book was first published in italian as a proposito de il capitale il lungo presente e i miei studenti corso di storia contemporanea milan francoangeli 2021 this english translation includes a new foreword by the author

economics is often referred to as the queen of social sciences this is because mainstream economics has been established as an elegant academic discipline by assuming mankind simply to be homo economicus an image of human beings showing interest in only material fulfilment and acting solely in his interest this book challenges this basic perception of human beings by replacing it with a more realistic and multifaceted human motive as supported by research in various academic disciplines the book tries to provide a novel and more plausible picture of human society specifically the book takes in such human aspects as pursuing well being forming human networks and the realisation of potential of ability thus if we try to better understand human motives and the society it becomes necessary to replace the conventional two sector market government social model with a more general and theoretically superior social model the three sector model consisting of market government non profit sectors this book demonstrates the validity of this new view by utilising basic principles of economic policy and social welfare analyses moreover the book has introduced a newly developing practical philosophy in japan over the last 50 years to achieve both individual well being and better human society
