this book focuses on the topic of competency based scenario design as it relates to intelligent tutoring systems itss the current book is the ninth in a series of books that examine key topics in itss the chapters in this book specifically relate the work presented to applications for the generalized intelligent framework for tutoring gift sottilare brawner goldberg holden 2012 sottilare brawner sinatra johnston 2017 gift is an open source domain independent service oriented modular architecture for itss gift has specifically been designed to allow for reusability of the gift architecture gift tools and instructional content materials further gift has been designed with the goals of reducing the amount of time necessary to author itss and reducing the skill level required for the authoring process gift can be used to create itss that can be distributed both locally on a computer and virtually in the cloud in addition to creating itss gift can be used to examine instructional outcomes and conduct research the topic of this book competency based scenario design is highly relevant to

the development of itss scenarios are information rich task problem contexts that are closely aligned with real world situations that professionals face in their jobs the tasks problems exhibit ecological validity rather than stripped down abstract simplifications developers of itss and other adaptive instructional systems need to have principled guidance on how to design these scenarios an example scenario may be a close match to a particular situation in the past but not be representative of a large range of situations that professionals experience in their job an example scenario may be very realistic but not provide reliable and valid assessments of the learners performance to guide assessments summative formative or stealth research teams that build high quality scenarios need to include expertise in the targeted profession assessment learning science and computer science the current book brings together experts on itss to discuss their work as it applies to competency based scenario design we believe that this book can be used as a resource for those who have an interest in developing scenarios for itss and who want to learn more about how to do so

the internet of medical things iomt is a system that collects data from patients with the help of different sensory inputs e g an accelerometer electrocardiography and electroencephalography this text presents both theoretical and practical concepts related to the application of machine learning and internet of things iot algorithms in analyzing data generated through healthcare systems illustrates the latest technologies in the healthcare domain and the internet of things infrastructure for storing smart electronic health records focuses on the importance of machine learning algorithms and the significance of internet of things infrastructure for healthcare systems showcases the application of fog computing architecture and edge computing in novel aspects of modern healthcare services discusses unsupervised genetic algorithm based automatic heart disease prediction covers internet of things based hardware mechanisms and machine learning algorithms to predict the stress level of patients the text is primarily written for graduate students and academic researchers in the fields of computer science and engineering biomedical engineering electrical engineering and information technology

usa report on relationships between vocational education programmes job satisfaction and workers adaptation presents a literature survey considers social adjustment in the light of a theoretical approach to work adjustment and implications for the work environment quality of working life occupational qualifications labour demand etc and draws conclusions regarding the reinforcement of vocational counselling bibliography pp 25 to 30

these proceedings represent the work of contributors to the 19th european conference on cyber warfare and security eccws 2020 supported by university of chester uk on 25 26 june 2020 the conference co chairs are dr thaddeus eze and dr lee speakman both from university of chester and the programme chair is dr cyril onwubiko from ieee and director cyber security intelligence at research series limited eccws is a well established event on the academic research calendar and now in its 19th year the key aim remains the opportunity for participants to share ideas and meet the conference was due to be held at university of chester uk but due to the global covid 19 pandemic it was moved online to be held as a virtual event the scope of papers will ensure an interesting conference the subjects covered illustrate the wide range of topics that fall into this important and ever growing area of research
