progress in the theory of economic equilibria and in game theory has proceeded hand in hand with that of the mathematical tools used in the field namely nonlinear analysis and in particular convex analysis jean pierre aubin one of the leading specialists in nonlinear analysis and its application to economics has written a rigorous and concise yet still elementary and self contained textbook providing the mathematical tools needed to study optima and equilibria as solutions to problems arising in economics management sciences operations research cooperative and non cooperative games fuzzy games etc it begins with the foundations of optimization theory and mathematical programming and in particular convex and nonsmooth

analysis nonlinear analysis is then presented first game theoretically then in the framework of set valued analysis these results are then applied to the main classes of economic equilibria the book contains numerous exercises and problems the latter allow the reader to venture into areas of nonlinear analysis that lie beyond the scope of the book and of most graduate courses

in this book new results or developments from different research backgrounds and application fields are put together to provide a wide and useful viewpoint on these headed research problems mentioned above focused on the motion planning problem of mobile robots these results cover a large range of the problems that are frequently encountered in the motion planning of mobile robots both in theoretical methods and practical applications including obstacle avoidance methods navigation and localization techniques environmental modelling or map building methods and vision signal processing etc different methods such as potential fields reactive behaviours neural fuzzy based methods motion control methods and so on are studied through this book and its references the reader will definitely be able to get a thorough overview on the current research results for this specific topic in robotics the book is intended for the readers who are interested and active in the field of robotics and especially for those who want to study and develop their own methods in motion path planning or control for an intelligent robotic system
