 - Deductive Reasoning** This involves moving from general principles to specific conclusions If 2 all men are mortal premise 1 and Socrates is a man premise 2 then Socrates is mortal conclusion This is a classic syllogism
 - Inductive Reasoning** This starts with specific observations and moves towards a general conclusion For example observing many swans and noticing they are all white might lead to the potentially flawed conclusion that all swans are white
 - Abductive Reasoning** This involves forming the best explanation for an observation If the grass is wet the most likely explanation is that it rained However other explanations are possible eg sprinkler
- 2 Concise Answers Detailed Explanations Example Exercises** Lets tackle a few common types of logic exercises
 - Syllogisms Exercise** All cats are mammals Some mammals are furry Therefore some cats are furry
Concise Answer True although not all
Detailed Explanation While all cats are mammals not all mammals are cats The premise Some mammals are furry doesnt guarantee that furry mammals are cats The conclusion is valid because some cats are indeed furry However its crucial to recognize the conditional nature of the statement Deductive reasoning doesnt necessitate a universally true conclusion from true premises but it must be logically consistent
 - Logical Puzzles Exercise** Three friends Alice Bob and Carol each play a different instrument piano guitar and violin Alice doesnt play the piano Bob doesnt play the guitar Who plays which instrument
Concise Answer Alice plays the violin Bob plays the piano and Carol plays the guitar
