can one car transform a nation the ford model t did do so a century ago when it replaced the horse brought about a revolution in agriculture became a stimulus to urbanization that eventually changed the landscape of america though the maruti 800 the tata indica the hyundai santro and the maruti alto became engines of growth for india these cars neither drove away the cow nor changed the way indians travelled tata's nano was expected to change all that and become the ultimate people's car capturing the imagination of the middle class across nations and cultures in spite of its petite dimensions the nano was meant to stand tall yet it did not what caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the ford model t was introduced 100 years ago' but is it really all over or is there still hope for india's 'little wonder' what will the people's cars of tomorrow be like a million cars for a billion people delves into the questions concerns and doubts as well as the many misconceptions and myths that have gathered momentum over the years about india's automotive history and the industry's mission to create a true 'people's car' the very first cars that came to india the early beginnings of the industry the nascent history of the automobile across nations like germany france us the uk italy japan and south korea is narrated with authority and charm from the viewpoint of the quest for the ultimate people's car

lemon aid used cars and trucks 2010/2011 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years of production this book offers an exposé gas consumption lies a do it yourself service manual an archive of service bulletins granting free repairs and more

with the shift of the global economic gravity toward emerging economies and the roaring economic growth of the past three decades in china east asian catching up growth strategies have profound implications for latecomer economies while there are many handbooks on entrepreneurship in general there is no reference on east asian entrepreneurship this is the first of its kinds in the market the volume provides a useful reference for those who want to know east asian entrepreneurship and business systems it also provides many excellent cases and illustrations on the growth of entrepreneurial firms and the rise of branded products in east asia policy makers or scholars who are interested in entrepreneurship small and medium sized enterprises asian business systems international business innovation and

technology management economic development strategic management and east asian studies would benefit from this volume the volume contains two parts the first part is the key concepts associate with entrepreneurship and east asian firm growth and transformation the second part presents cases of entrepreneurial firms and their founders in east asia including japan south korea taiwan hong kong and china with the handbook scholars students and policy makers can grab some basic ideas how entrepreneurs and firms in east asia compete and survive in the world market and understand why and how east asia economies can emerge as one of the most dynamic regions in the world part i concepts relating to entrepreneurship guanxi catching up strategies types of entrepreneurship business system strategic management leadership part ii cases cover variedly from manufacturing to services industries and specifically including traditional and newly corporations ranging from toys convenient stores fast fashion high tech to catering and service written by experts in their respective areas handbook of east asia entrepreneurship is an excellent review of theories policies and empirical evidences on important topics in entrepreneurship in east asian economic development the book is both a superb teaching tool and a valuable handbook in development economics

over the past forty years state provincial and local governments in the united states and canada have provided foreign automakers with approximately 4 80 billion in incentives in order to lure light vehicles assembly plants to their areas this has included tax abatements infrastructure construction land giveaways job training programs and other subsidies as of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed north america despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the united states and canada before launching vehicle plants in developed north america each has followed its own specific historical development path and has created its own unique growth trajectory this book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the united states and or canada through early 2015 in addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the united states and canada this includes the first foreign automaker to build its cars in the united states de dion bouton of france in july 1900 the early 20th century endeavors of fiat mercedes and rolls royce and the present day hopes of chinese and indian automakers in the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the united states and canada and to help them take a more holistic look at the pros and cons of attracting automobile manufacturing fdi it is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in north america and worldwide

popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

the automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms internationalization strategies and the social practices that firms impose this book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued it highlights the diversity and forms of internationalization and the preference for regionalization rather than globalization that has occurred over the past decade this book looks specifically at the american and asian car industry
