i am very pleased to have been asked by rod gerber to provide a preface to such a book not least because of the twenty four chapters eight are written by former students or colleagues with whom i have worked in the past and whom i still meet at conferences on geographical education it is with a certain pride and joy that i note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as chair of the commission on geographical education of the international geographical union cgeiug my successors joe stoltman hartwig haubrich rod gerber and now lea houtsonen have done much and are continuing to work hard to foster the development of geographical education this book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except antarctica it would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as fairgrieve 1926 would have put it and as rod gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education
