the golden ages of the dark ages is an exciting historical analysis about the civilizations and empires that exist around the globe during the european dark ages the use of the maps in the chapters allows readers to visualize the civilizations development away from europe there are too many civilizations to compile thus this book is based on two basic philosophies that the time line is limited only to the prominent civilizations within 500 ce to 1500 ce and also to have a minimum of 100 years of history readers too must acknowledge that there were many other great world civilizations within and outside of the time line we can only pick a handful of the civilizations traditions and empires this is a factual book that might create further interests for readers to explore in depth some of the revelations this book too is hoped to help readers to critically analyze their past readings as history has been proven to be distorted by some of the historians
