the integrated solutions for bodie kane and marcus investments set the standard for graduate mba investments textbooks the unifying theme is that security markets are nearly efficient meaning that most securities are priced appropriately given their risk and return attributes the content places greater emphasis on asset allocation and offers a much broader and deeper treatment of futures options and other derivative security markets than most investment texts connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need when they need it and how they need it so that your class time is more engaging and effective

never highlight a book again virtually all of the testable terms concepts persons places and events from the textbook are included cram101 just the facts101 studyguides give all of the outlines highlights notes and quizzes for your textbook with optional online comprehensive practice tests only cram101 is textbook specific accompanys 9780131735217

this book emphasizes the applications of statistics and probability to finance the basics of these subjects are reviewed and more advanced topics in statistics such as regression arma and garch models the bootstrap and nonparametric regression using splines are introduced as needed the book covers the classical methods of finance and it introduces the newer area of behavioral finance applications and use of matlab and sas software are stressed the book will serve as a text in courses aimed at advanced undergraduates and masters students those in the finance industry can use it for self study

as opposed to a bank bailout a bail in occurs when creditors are forced to bear some of the burden of bank failure the principal aim of this restructuring tool is to eliminate some of the risk for taxpayers several jurisdictions including switzerland and the european union eu have adopted legal provisions regarding the bail in but until this book literature on its implementation has been scarce offering a detailed and comparative analysis of eu and swiss law relating to bail ins and their economic impact this is the first book to provide in depth coverage of this new method of dealing with the failure of systemically important banks in its contextualisation and analysis of the bail in resolution tool the book identifies and discusses the legal and economic issues that arise including such aspects as the following the legal and economic properties of bail in capital the regulatory standard on total loss absorbing capacity tlaac issued by the financial stability board fsb the scope and sequence of liabilities subjected to bail in the legal position of stakeholders affected by a bail in strategies and procedures for the implementation of a bail in the limited circumstances under which government rescues should be available and cross jurisdictional issues and aspects of international cooperation as well as case studies and analyses of legal issues with particular reference to swiss law and the european bank resolution and recovery directive 2014 59 eu the author applies economic concepts to the analysis of the law international developments in particular standards issued by leading regulatory bodies are also covered this book will be

welcomed by legal practitioners working in banks and in banking regulation and by policymakers seeking information on the practical issues involved as a detailed analysis of a new and highly significant development in banking law it will also be of great interest to academics

bodie kane and marcus investments and portfolio management sets the standard for graduate mba investments textbooks it blends practical and theoretical coverage while maintaining an appropriate rigor and a clear writing style its unifying theme is that security markets are nearly efficient meaning that most securities are priced appropriately given their risk and return attributes the text places greater emphasis on asset allocation and offers a much broader and deeper treatment of futures options and other derivative security markets than most investment texts it is also the only graduate investments text to offer an online homework management system mcgraw hill s connect plus finance

the mznlnx exam prep series is designed to help you pass your exams editors at mznlnx review your textbooks and then prepare these practice exams to help you master the textbook material unlike study guides workbooks and practice tests provided by the textbook publisher and textbook authors mznlnx gives you all of the material in each chapter in exam form not just samples so you can be sure to nail your exam

bachelor thesis from the year 2021 in the subject business economics investment and finance grade 1 0 language english abstract this study is concerned with an empirical analysis of asset pricing more specifically this paper examines whether multifactor asset pricing models are able to explain variation in reit returns in the us and japan in addition to traditional multifactor models an alternative four factor model aff was developed considering net profit margin as an additional risk factor thence this paper seeks to provide valuable information for investors and fund managers regarding their indirect real estate investment selection using a sample period between july 1994 us july 2011 japan to december 2020 rigorous multiple time series regression is applied to calculate factor loadings for each risk factor and the corresponding alpha values of each model to evaluate their effectiveness in explaining variation and cross section of reit returns most studies on asset pricing models focus on size and value sorted portfolios as dependent variables this paper broadens the approach with four other double sorted test portfolios to check the robustness of each single factor to explain return anomalies results show that market premium and size premium represent risk factors for us reits whereas market premium and value premium are suitable risk factors for japanese reits the momentum factor does not capture risk and is insignificant in both markets the study shows low correlations between traditional and reit specific as well as between us and japanese risk factors this suggests that firstly risk factors are country specific and secondly that they are asset specific moreover the fama french three factor model ff3 clearly outperforms the capm while the carhart four factor model ch4 marginally improves the explanatory power over the ff3 this is observed in both

markets outcomes demonstrate that the alternative four factor model aaf does not improve prediction power for returns of japanese reits compared to the ff3 and ch4 on the contrary results are ambiguous concerning us reits while the additional risk factor net profit margin generates a negative return the model is superior to the ff3 and ch4 in terms of explaining variation and cross section of returns

the market leading undergraduate investments textbook essentials of investments 9e by bodie kane and marcus emphasizes asset allocation while presenting the practical applications of investment theory the authors have eliminated unnecessary mathematical detail and concentrate on the intuition and insights that will be useful to practitioners throughout their careers as new ideas and challenges emerge from the financial marketplace the ninth edition includes increased attention to changes in market structure and trading technology while continuing to be organized around one basic theme that security markets are nearly efficient connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need when they need it and how they need it so that your class time is more engaging and effective

of those in management education who debates whether business ethics should be taught as a stand alone course or in an embedded manner most recommend combining both approaches for optimal results this book provides unique insights into the experience of seasoned academics who embed business ethics in teaching management theory and practice its multidisciplinary approach enriches its content since the insights of our colleagues from within their fields are invaluable it therefore complements other business textbooks after general themes curriculum integration adult learning learner commitment and generation y classrooms this volume covers ethics and responsibility in people management team building change management operations management business law and digital marketing communications the book provides a platform to share experiences of teaching ethical profitability it contributes to resolving concerns experienced when faculty wish to incorporate ethics into their teaching but feel they lack preparation or ideas on how to do it the chapters describe each discipline briefly raise the typical ethical issues therein and suggest teaching strategies and exercises or projects the developing versus developed country perspectives sections may interest schools with high student diversity the book also meets in company training needs for attaining and sustaining an ethical culture

seminar paper from the year 2015 in the subject economics finance grade 2 1 bpp university business school course msc accounting and finance language english abstract it is very important for a company to identify the associated risks understand the causes of risks and find out the way to minimize the risks and how these can affect the required return by investors in order to achieve its objectives the objective of this report is to consider and calculate the return and risks characteristics of the two investment funds managed by thompson asset management information through standard deviation correlation beta calculation

sharp ratio treynor ratio jensen s alpha tracking error and information ratio have been obtained to prepare the report

diploma thesis from the year 2007 in the subject business economics investment and finance grade 1 0 european business school international university schloß reichartshausen oestrich winkel language english abstract in a time of tremendous advances in technology it seems striking why the location of corporate headquarters should matter for the firm s stock return at first glance low information and communication costs are thought to facilitate the interaction between market participants all around the world and thus deem the role of geographical location as marginal this reasoning however does not take investors behavior into account even if over the past decades international capital markets have widely been liberalized and the variety of investment opportunities across countries has grown substantially many investors do not take the risk reduction potential of foreign assets into consideration despite the extensive benefits of international diversification investors still overweight domestic and local assets in their portfolios although this home bias has drawn much academic attention and its existence is commonly accepted a satisfactory rationale could not yet be obtained further the resulting economic implications for asset pricing remain unexplored yet locality could be highly relevant for cost of capital calculation asset allocation and performance evaluation 1 as a result it is of crucial importance to investigate the relationship between portfolio holdings of investors and stock pricing patterns to shed light on a potential geographical component of asset pricing the lack of academic research motivates to explore this area in greater detail the purpose of this thesis is to fill the existing gap and establish a link between local bias and asset pricing therefore a detailed overview of the home bias puzzle as well as of local asset pricing is presented the economic impact of local bias on stock returns is empirically investigated thus the key question of the analysis is whether the location of corporate headquarters has an impact on stock returns attributable to the local bias of investors

seminar paper from the year 2008 in the subject business economics business management corporate governance grade 1 2 european business school international university schloß reichartshausen oestrich winkel language english abstract the capital asset pricing model capm was introduced by william sharpe john lintner and jan mossin in the 1960s on the basis of harry markowitz s achievements in the field of portfolio theory since then the capm has been one of the most widely used models for evaluating the price of portfolio assets a major element of the capm is the beta factor the beta factor measures how the expected return of a stock or a portfolio correlates with the return of the whole market obviously the fluctuation of a stock does affect beta factors as the value of beta is decisive for the portfolio selection process it is necessary to provide the capm with a beta that represents the best possible estimate of correlation with the market on account of this the calculation of beta factors is complex as betas will vary over time in addition sample size variation can cause change within the beta the aim of this seminar paper is to show the influence of the sample size on the beta factor furthermore it shall attempt to define

the determinants of an ideal sample size

diplomarbeit aus dem jahr 2009 im fachbereich bwl investition und finanzierung note 1 3 universität zu köln sprache deutsch abstract seit mitte der neunziger jahre hat sich der markt für unternehmensanleihen zu einer zunehmend bedeutenden finanzierungsquelle des privatwirtschaftlichen sektors entwickelt jedoch sind die märkte einzelner nationen und regionen dabei durchaus abweichenden entwicklungspfaden gefolgt und haben bisher unterschiedliche reifegrade erreicht so ist der corporate bond markt der usa der als einer der fortschrittlichsten und aktivsten gilt durchaus in kontrast zu denen in entwicklungsländern zu sehen wobei auch bei letzteren eine rasante entwicklung zu beobachten ist auch der corporate bond markt in europa und speziell in deutschland spielte lange zeit im vergleich zu den usa eine eher untergeordnete rolle im zuge der europäischen währungsunion haben sich die einzelnen nationalen märkte in europa jedoch massiv gewandelt sie wuchsen durch die einföhrung des euro im jahr 1999 zusammen und gewannen an liquidität emittenten und investoren gleichermaßen begannen den europäischen corporate bond markt als einheit wahrzunehmen wodurch dieser in den letzten jahren einen bis dato unerreichten aufschwung erfahren hat dieser starke anstieg ist neben der einföhrung einer einheitlichen währung auch auf die auswirkungen von basel ii und den technologieboom ende der neunziger jahre zurückzuführen was zum einen die kreditvergabe an unternehmen erschwerte und zum anderen den finanzierungsbedarf von unternehmen erhöhte zusätzlich kam es seit 1993 mit beginn der fünften merger welle zu einem anstieg von unternehmensübernahmen was die nachfrage nach dieser finanzierungsform weiter förderte in kontrast zum aktienmarkt werden unternehmensanleihen deutlich seltener und dabei von weitaus weniger marktteilnehmern gehandelt aus diesem grund und zusätzlich durch die vom aktienmarkt abweichenden marktstrukturen für unternehmensanleihen sind diese we
