the younger studies of management and technology have mainly two objectives first there is the objective to stimulate and to support a critical and balanced integration of two different orientated disciplines of science the second objective is to overcome the monistic approach of science and to promote a pluralistic and holistic approach the holistic approach leads to an enlarged knowledge bringing better decision advices of science for practice this particular enlarged knowledge does not only give a better foundation to realize solution for the overcoming of crises but it also can prevent crises in democratic economic systems the sustainable market economy is based on the idea of the united nations to install a worldwide sustainable development process the objective of this process is to reduce the difference between poor and rich countries the concept of the sustainable market economy is founded on the basic idea of economics to realize market equilibria adam smith it is shown that economic equilibria also ensure economic sustainability because economic crises are present in economic disequilibria the realization of the economic sustainability prevents systemic self made economic crises and also ensures welfare so it is logical to realize economic sustainability consequently in spite of the dominance of political compromises in democratic societies

using variants of a modified version of dornbusch s model of price level and exchange rate dynamics it is demonstrated that satisfaction of the formal condition for existence of a unique non explosive solution of a linear rational expectations model with forward and backward looking dynamic processes equality of the number of stable roots with the number of independent backward looking processes does not guarantee the economic sensibility of this solution even if one accepts the usual arguments for excluding speculative bubbles from the solutions of such models moreover satisfaction of the formal condition for existence of an infinity of non explosive solutions for such rational expectations models more stable roots than independent backward looking processes does not assure that any of these solutions is economically sensible

this book offers a concise introduction to the field of financial economics and presents for the first time recent behavioral finance research findings that help us to understand many puzzles in traditional finance tailor made for master s and phd students it includes tests and exercises that enable students to keep track of their progress parts of the book can also be used at the bachelor level
