raising the living dead is a new history of puerto rico s carceral rehabilitation system in the middle decades of the twentieth century that brings to life the interactions of incarcerated people their wider social networks and health care professionals the book addresses key issues in the history of prisons and the histories of medicine and belief including how prisoners different racial class and cultural identities shaped their incarceration and how professionals living in a colonial society dealt with the challenge of rehabilitating prisoners for citizenship the main idea of the book is that in the region multiple communities of care came together both inside and outside of prisons to imagine and imperfectly enact solution oriented cultures of rehabilitation specifically alberto ortiz díaz argues that scientific and humanistic approaches to well being were deliberately fused to raise the living dead an expression that reemerged in the modern caribbean to refer to prisoners these reform groups sought to raise incarcerated people physically mentally socially spiritually and civically the book is based on deep original archival research into the oso blanco white bear penitentiary in puerto rico yet it situates its study
