this is a collection of essays from leading public intellectuals that identifies major conceptual problems in the analysis of poverty and inequality and advances strategies for reducing poverty and inequality that are consistent with these new conceptual and methodological approaches

most americans persist in believing that poverty results primarily from individual deficiencies people are poor because they lack intelligence determination and skills in opposition to this dominant individualistic view poverty and power proposes that american poverty is a structural problem resulting from the failings of the political economy not the failings of the poor in poverty and power edward royce argues that the current poverty problem originates from changes in the larger economic political and cultural landscape and from a corresponding shift in the balance of power that has worked to the advantage of business over labor

many agree that neoliberal economic policies have led to growing class inequality and increasing levels of poverty investigating the challenges that the growing financial and class disparity poses for the engaged social work academic and practitioner the contributors look at the current state of poverty and inequality in a number of countries and examine social work s response to it they argue that especially for a profession committed to values based on equality social justice and the meeting of human needs poverty imposes a special requirement on social workers and academics to speak out when policies don t work and the plight of the impoverished is exacerbated

an examination of the presence and persistence of urban poverty and the dilemmas of local reform

given the increasing diversity of the nation particularly with respect to its growing hispanic and asian populations why does

racial and ethnic difference so often lead to disadvantage in the colors of poverty a multidisciplinary group of experts provides a breakthrough analysis of the complex mechanisms that connect poverty and race the colors of poverty reframes the debate over the causes of minority poverty by emphasizing the cumulative effects of disadvantage in perpetuating poverty across generations the contributors consider a kaleidoscope of factors that contribute to widening racial gaps including education racial discrimination social capital immigration and incarceration michèle lamont and mario small grapple with the theoretical ambiguities of existing cultural explanations for poverty disparities they argue that culture and structure are not competing explanations for poverty but rather collaborate to produce disparities looking at how attitudes and beliefs exacerbate racial stratification social psychologist heather bullock links the rise of inequality in the united states to an increase in public tolerance for disparity she suggests that the american ethos of rugged individualism and meritocracy erodes support for antipoverty programs and reinforces the belief that people are responsible for their own poverty sociologists darren wheelock and christopher uggen focus on the collateral consequences of incarceration in exacerbating racial disparities and are the first to propose a link between legislation that blocks former drug felons from obtaining federal aid for higher education and the black white educational attainment gap joe soss and sanford schram argue that the increasingly decentralized and discretionary nature of state welfare programs allows for different treatment of racial groups even when such policies are touted as race neutral they find that states with more blacks and hispanics on welfare rolls are consistently more likely to impose lifetime limits caps on benefits for mothers with children and stricter sanctions the colors of poverty is a comprehensive and evocative introduction to the dynamics of race and inequality the research in this landmark volume moves scholarship on inequality beyond a simple black white paradigm beyond the search for a single cause of poverty and beyond the promise of one magic bullet solution a volume in the national poverty center series on poverty and public policy

at a time when the divide between the wealthy and the disadvantaged is widening this major textbook provides students with a critical understanding of poverty and social exclusion in

relation to wealth rather than as separate from it raising fundamental questions about the organisation of society social structures and relationships and social justice the book is split into four main sections exploring key concepts and issues people and place poverty and wealth across different groups and situations the role of the state and prospects for the future this is the only textbook to focus on the links between wealth and poverty and contains an edited collection of chapters specially written by a distinguished panel of contributors including pete alcock daniel dorling mary shaw gill scott and jay ginn it is designed with the needs of students in mind and includes useful chapter summaries illustrative boxes and diagrams and pointers to relevant websites and other sources of further information this is an essential textbook for level 1 2 undergraduate students studying social policy either as a main subject or as part of their course it is a core text for level 3 4 specialist modules in this field

leading scholars examine the conflicting paradigms of affluence and destitution in the united states as well as other free societies and discuss the influence of education race and status on economic mobility while recent catastrophic events in new orleans and haiti may have magnified issues of social inequity leaders have debated over poverty and discrimination for decades are the poor disadvantaged by the institutions of society or by the choices they make through two insightful volumes the author examines differing academic and political perspectives to help shed light on the causes of poverty and inequality the role that gender race age or sexual preference plays in determining opportunity and the effectiveness of current social and economic policies in balancing the inequity among disparate groups the economics of inequality poverty and discrimination in the 21st century consists of 2 volumes containing 32 papers divided into 5 categories measurement inequality and mobility institutions and choices demographic groups and discrimination and policy the papers written by economists sociologists philosophers and lawyers deal with the extent of inequality in the united states and how it compares to other countries and the newly emerging evidence on the relationship between inequality and mobility within a society

thoroughly classroom tested this introductory level text surveys

what economists have to say about inequality or income and wealth distribution poverty mobility both intragenerational within careers and intergenerational between generations and discrimination on the basis of race ethnicity age gender and many other factors in the united states this text brings the undergraduate treatment of these issues up to date featuring detailed but not mathematical examination of the economic theory underlying the analysis there is a greater emphasis on mobility on wealth accumulation distribution and inheritance and on discrimination law than in other texts the author provides full and fair treatment of competing sides in several of the controversial issues in the field written in such a way that instructors can use the text material to motivate a variety of classroom discussions an instructor s manual featuring solutions to the end of chapter questions is available online to adoptors

this book addresses key questions about whether inequality in incomes wealth and education have been widening in a consistent fashion across 30 rich nations and whether this is exacerbating social problems and undermining the healthy functioning of democratic processes

monograph on the determinants of poverty and income distribution in the usa contrasts earnings capacity and current income concepts in the measurement of economic status explores the effects of labour market discrimination and discusses social policy implications references and statistical tables

this book focuses on the role of growth and employment unemployment developments in explaining recent income inequality trends in brazil china india and south africa and discusses the roles played by labour market and social policies in both shaping and addressing these inequalities

this textbook explores racial and economic inequality in america focusing on the division between personal and institutional racism and classicism

in this handbook stephen farrall and susan mcvie bring together a diverse array of leading experts to examine the relationship between different aspects of crime and inequality they employ a variety of geographical and individual lenses and use case

studies from the global north and south

synopsis thoroughly classroom tested this introductory text provides a balanced up to date non mathematical examination of the economic theory underlying the analysis of inequality poverty mobility and income distribution in the united states

this book analyzes the discourse generated by pundits politicians and artists to examine how poverty and the income gap is framed through specific modes of representation set against the dichotomy of the structural narrative of poverty and the opportunity narrative lemke s modified concept of precarity reveals new insights into the american situation as well as into the textuality of contemporary demands for equity her acute study of a vast range of artistic and journalistic texts brings attention to a mode of representation that is itself precarious both in the modern and etymological sense denoting both insecurity and entreaty with the keen eye of a cultural studies scholar her innovative book makes a necessary contribution to academic and popular critiques of the social effects of neoliberal capitalism

is there a tradeoff between raising growth and reducing inequality and poverty this paper reviews the theoretical and empirical literature on the complex links between growth inequality and poverty with causation going in both directions the evidence suggests that growth can be effective in reducing poverty but its impact on inequality is ambiguous and depends on the underlying sources of growth the impact of poverty and inequality on growth is likewise ambiguous as several channels mediate the relationship but most plausible mechanisms suggest that poverty and inequality reduce growth at least in the long run policies play a role in shaping these relationships and those designed to improve equality of opportunity can simultaneously improve inclusiveness and growth

for courses in economics of poverty and discrimination welfare politics and policy social problems and sociology of poverty in the departments of economics sociology urban studies education and social work as the leading college text in the field for over twenty years this book has been distinguished by its relevant coverage tight organization multidisciplinary perspective and

timeliness the ninth edition preserves these qualities while incorporating new reference material

wealth and money which are meant to be sources of human happiness and facilitators of good social relations has instead become a monstrosity beyond human control the unbridled quest to make money and accumulate wealth as well as assign social signification on the basis of the outcome of individuals efforts in the process has ended up distorting existence and the meaning of being human itself this work brings together a collection of very provocative and challenging articles that confront the problems created by wealth can there be happiness when wealth is increasingly concentrated in fewer and fewer hands can wealth really bring happiness and what are the implications of the current trend to commodify everything for the project of human happiness the contributors to the volume argue that there is a need to change wealth accumulation and its core purpose they contend that from wealth accumulation the gear must change to wealth alleviation because the ways the rich become wealthy often correlate with the ways the number of the poor increase following from this they argue that rather than the current focus on poverty alleviation the focus should shift to wealth alleviation because a happy future for all lies in promoting human well being and removing human ill being through the spring wells of solidarity and humanity
