this book collects essays published in journals including commentary the weekly standard and elsewhere it centers on three profound mysteries the existence of the human mind the existence and diversity of living creatures and the existence of matter how they did they come into being the author dr david berlinski is a senior fellow at the discovery institute and formerly a fellow at the institut des hautes tudes scientifiques in france his other books include the devil's delusion atheism and its scientific pretensions newton's gift and a tour of the calculus

the deniable darwin is an article written by david berlinski that originally appeared in the june 1996 issue of commentary berlinski questions the validity of the theory of evolution proposed by english naturalist charles robert darwin 1809 1882 the article asserts that the fossil record is incomplete and the basic reasoning behind the theory is flawed

darwinian evolution and classical liberalism canvasses an array of thinkers from the past to the present as it examines fundamental political philosophical ethical economic anthropological and scientific aspects of the ferment between darwinian biology and classical liberalism early chapters focus on classical thinkers like

john locke and adam smith while later chapters provide analyses of present day classical liberals focusing especially on f a hayek thomas sowell and larry arnhart the most prominent advocates of contemporary classical liberalism thematically the volume falls into three parts part i examines foundational matters arguing that darwinism and classical liberalism hold incompatible visions of morality human nature and individual autonomy this section also contends that the free market s spontaneous order is fully compatible with a teleological or non darwinian view of the universe part ii turns to contemporary applications contending that darwinism and classical liberalism are at odds in their views of or implications about limited government vital religion economic freedom and the traditional family this section also argues that since its inception darwinism has attenuated core tenets and values of classical liberalism and western civilization part iii of the volume contains alternative views to those in the first two parts adding critical diversity to the book respectively these chapters hold that darwinian evolution simply has little to say about classical liberalism an evolutionary account of human volition is fully compatible with the individual choice presupposed in classical liberalism and evolutionary naturalism unlike religious alternatives provides a strong foundation for freedom morality and the traditional family

as we begin the third millennium there is cause for cautious optimism regarding the human prospect democratic revolutions and the doctrine of universal human rights have captured the imagination of large sectors of humanity while major advances in science and technology continue to conquer disease and extend life contributing to rising standards of living affluence and cultural freedom on a worldwide basis paradoxically at the same time ancient authoritarian fundamentalist religions have grown in vitriolic intensity along with bizarre new age media driven paranormal belief systems also surprising is the resurgence of primitive tribal and ethnic loyalties unleashing wars of intolerance and bitterness in skepticism and humanism paul kurtz locates these threatening developments within a long standing and largely unchallenged theological worldview he proposes as an alternative to religion a new cultural paradigm rooted in scientific naturalism rationalism and a humanistic outlook an estimated 60 percent of scientists are atheists or agnostics however the skeptical world view has been given little currency even in advanced societies because of a cultural prohibition against the criticism of religion at the same time science has become increasingly narrow and specialized so that few people can draw on its broader intellectual and cultural implications skepticism and humanism attempts to meet this need it defends skepticism as a method for developing reliable knowledge by using scientific inquiry and reason to test all claims to truth it also defends scientific naturalism an evolutionary view of nature life and the human species kurtz sees the dominant religious doctrines as drawn from an agricultural nomadic past and emphasizes the need for a new outlook applicable to the postindustrial information age at the same time he rejects postmodernism for abandoning science and embracing a form of nihilism there can be no doubt that as a new global civilization emerges scientific naturalism rationalism and secular humanism have something significant to say about the meaning of life skepticism and humanism shows how they can to foster democratic values and social prosperity the book will be important for philosophers scientists and all those concerned with contemporary issues

designer science is the first full length history of intelligent design an antievolutionary movement from the turn of the 21st century that tried to rewrite the rules of science and had a lasting impact on public perception of science in america

finally a fresh look at the creation evolution debate designed for anyone who wonders about biological origins evolution confusion the logic of origins cuts through the jargon with an unconventional exposé of naturalism the dominant philosophy underlying all of science today using logic math science and a healthy dose of common sense this book scrutinizes naturalism like never before in so doing it lays the groundwork for open dialogue around the age old question where did everything come from this book is a must read for everyone who wants to think clearly about our origins purpose and destiny evolution confusion is sure to inspire many to reconsider a debate that has left a wake of confusion for too long

thomas woodward traces the continuing saga of the id movement in darwin strikes back helping readers navigate the tangled maze of public debate and showing them what might be coming next

examines intelligent design as a science a philosophy and a movement for educational reform central to all three aspects of id is its claim that if science education is to be other than state sponsored propaganda a distinction must be drawn between empirical science and materialist philosophy

seven lectures graced the second in the annual series at the irish college devoted to the 13th century saint and theologian the topics include friendship and love the desire for happiness as a way to god the separated soul s natural knowledge and truth as a good appended is a guide to consultat

includes section book reviews

the award winning team of john ankerberg and john weldon examines the many facets of the creation versus evolution controversy as discoveries are made about the universe some evolutionists now admit that much of the new evidence favors creation fascinating and informative this comprehensive guide is perfect for christians creation skeptics and those curious about the debate

an insider s look at the dramatic debate between darwinism and intelligent design showing how and why the secular religion of our time is beginning to crumble
