this book pieces together the jigsaw puzzle of einstein s journey to discovering the special theory of relativity between 1902 and
1905 einstein sat in the patent office and may have made calculations on old pieces of paper that were once patent drafts one
can imagine einstein trying to hide from his boss writing notes on small sheets of paper and according to reports seeing to it that
the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching
his door he probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the patent
office the end result was that einstein published nothing regarding the special theory of relativity prior to 1905 for many years
before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years
prior to 1905 unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources
from this critical period to provide any information about the crucial steps that led einstein to his great discovery in may 1905
henri poincaré sent three letters to hendrik lorentz at the same time that einstein wrote his famous may 1905 letter to conrad

lorentz poincaré presented the basic equations of his 1905 dynamics of the electron meaning that at this point poincaré and

einstein both had drafts of papers relating to the principle of relativity the book discusses einstein s and poincaré s creativity and the process by which their ideas developed the book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of einstein
