The Sibley Guide to Trees is an astonishingly elegant guide to a complex subject. It condenses a huge amount of information about tree identification, more than has ever been collected in a single book, into a logical, accessible, easy-to-use format. With more than 4100 meticulous, exquisitely detailed paintings, the guide highlights the often subtle similarities and distinctions between more than 600 tree species, native trees as well as many introduced species. No other guide has ever made field identification so clear. Features highlighted include leaves (including multiple leaf shapes and fall leaf color), bark, needles, cones, flowers, fruit, twigs, and silhouettes. More than 500 maps show the complete range, both natural and cultivated, for nearly all species. Trees are arranged taxonomically, with all related species grouped together by focusing on the fundamental characteristics of, for example, oaks or chestnuts or hickories. The guide helps the user recognize these basic species groups the same way birders recognize thrushes, warblers, or sparrows. In addition, there are essays on taxonomy, on the cultivation of trees, and on conservation issues, reflecting Sibley's deep concern with habitat preservation and environmental health.
