for most economists labor is simply a commodity bought and sold in markets like any other and what happens after that is not their concern individual prospective workers offer their services to individual employers each acting solely out of self interest and facing each other as equals the forces of demand and supply operate so that there is neither a shortage nor a surplus of labor and in theory workers and bosses achieve their respective ends michael d yates in work work work labor alienation and class struggle offers a vastly different take on the nature of the labor market this book reveals the raw truth the labor market is in fact a mere veil over the exploitation of workers peek behind it and we clearly see the extraction by a small but powerful class of productive property owning capitalists of a surplus from a much larger and propertyless class of wage laborers work work work offers us a glimpse into the mechanisms critical to this subterfuge in every workplace capital implements a comprehensive set of control mechanisms to constrain those who toil from defending themselves against exploitation these include everything from the herding of workers into factories to the extreme forms of surveillance utilized by today s captains of industry like the walton family of the walmart empire and jeff bezos

health inequity not only has tremendous economic burden but also impairs the foundations of social justice in any society the current state of scientific knowledge supports the existence of significant inequities and disparities between different social groups a significant part of our understanding of the health inequities lies in the realm of physical diseases though mental health s nature makes it more vulnerable to disparities mental health issues are sensitive matters that require additional trust cultural appropriateness acceptance and support from healthcare providers and healthcare systems as a result not only mental health patients are at risk of disparities that exist in physical diseases but they also face other challenges such as social stigma language barriers and fear of treatment that could result in disparities considering all these we need to understand where the inequities are in the realm of mental health and who is being affected the most we also need to know the existing policies and their effectiveness and efficiency and with all these then we could plan how to decrease mental health disparities and provide welfare to all
